WORKSHOP

Sustainable Supply Chain & Procurement:

Building Resilient and Responsible Value Chains

For supply chain and procurement professionals, sustainability professionals, and strategy and risk professionals at all levels.

As sustainability expectations, regulations, and stakeholder demands continue to reshape global supply chains, organisations need to look beyond cost and efficiency to build supply networks that are resilient, responsible, and future-ready. Sustainable supply chain practices can help businesses manage ESG risks, strengthen supplier relationships, improve operational efficiency, and remain competitive in a changing market.

This workshop provides practical insights into supply chain mapping, ESG risk assessment, sustainable procurement, supplier engagement, sustainable logistics, and the use of data and technology. Participants will explore how sustainability can be integrated across the supply chain while balancing business priorities such as cost, quality, resilience, compliance, and long-term value creation.

Fees	**RM 1,800 per pax** (HRD claimable | Limited seats – reserve now)

Group discounts available on-request.

Learning Outcomes

- Understand the key principles, drivers, and business importance of sustainable supply chain management
