Shape the future of sustainability reporting with confidence and clarity.

As global adoption of IFRS S1 and IFRS S2 accelerates, organisations need practical capabilities to meet evolving sustainability reporting requirements. This programme equips participants with the knowledge and skills to understand and apply the ISSB Standards, moving beyond awareness to practical implementation.

Participants will gain insights into sustainability-related financial disclosures, climate-related reporting, and the integration of sustainability risks and opportunities into corporate reporting. Aligned with the ISSB's global baseline and Bursa Malaysia's direction towards IFRS S1 and S2 adoption, the programme prepares organisations to deliver quality, investor-focused sustainability disclosures.
